

STORMWATER & EROSION CONTROL MINIMUM REQUIREMENTS

- **All** land disturbing projects and contractors are to abide by the Clean Water Act which states it is unlawful to discharge any pollutant from a point source into navigable waters.
- **All** land disturbance activities must acquire a no cost land disturbance permit.
- All Best Managements Practices (BMPs) must be approved practices from the Tennessee Department of Environment & Conservation's Erosion & Sediment Control Handbook (Current edition).
- Projects disturbing one (1) acre or more (or are part of a larger development) must acquire a Stormwater Permit through the Tennessee Department of Environment and Conservation (TDEC).
- Preconstruction meeting required before permit can be issued.
- Any land disturbing projects over an acre are required to be approved by the City of Union City and TDEC. The City of Union City has a Stormwater packet that will include documents such as checklists, a maintenance contract (if applicable), and grading notes that are required to be signed, reviewed, and submitted to the Stormwater Program Manager before the Stormwater plan review process takes place.
- Upon submittal of the Stormwater packet, stamped Construction Drawings, Erosion Control Plans, and SWPPP are a requirement. (Hard copies and electronic)
- Any spills or illicit discharges must be reported to the Stormwater Hotline: 731-885-9601
